

SYSTRAN

Enterprise Server 8

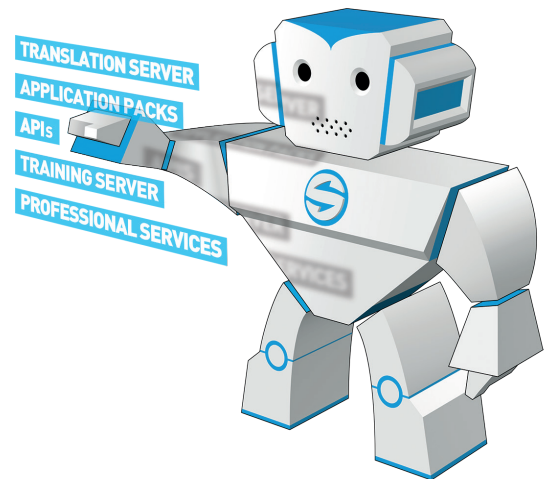

TEAM EDITION

Accurate. Fast. Smart.

Discover the only comprehensive on-site solution able to meet the full range of translation needs on an enterprise scale.

Powered by SYSTRAN's new-generation hybrid machine-translation (MT) engine, SYSTRAN Enterprise Server 8 combines the best attributes of rule-based and statistical machine translation. SYSTRAN Enterprise Server 8 fits your corporate expectations for quality, enhanced collaboration, cost-effectiveness, productivity and information security.

Easy to deploy, SYSTRAN Enterprise Server 8 can be used by teams or departments that need to translate at a lower cost all types of documents and files including manuals, technical documentations, procedures, reports, customer support information, product information... while at the same time preserving the original document layout.

Key benefits

Supported languages

With more than 45 languages available, you can translate the most popular languages spoken in the world (Simplified and traditional Chinese, Arabic, French, German, Spanish ...) and more upon request.

Accurate translations

Default translation engines can be enhanced with custom models in various domains such as Economics, Tourism, Healthcare, Automotive, etc. SYSTRAN can also train your engines to integrate your own corporate or industry terminology in order to significantly improve translation accuracy.

Information security and confidentiality

By providing a translation server on site with robust interfaces against DoS attacks, your data and translations never leave your network, so all your sensitive information remain confidential and totally secure.

Intuitive and user-friendly tools

Online tools and client applications help end-users perform translations quickly and easily: text, including any text appearing on the screen and below the mouse cursor, files, webpages, instant messages...

TEAM EDITION
